Geometry Processing Lab 2012
Anisotropic Filtering of Non-Linear Surface Features

Phan-Anh Nguyen

July 28, 2012

1 Introduction

According to the handbook of van Leunen [HP04], this paragraph—and certainly this section—should be longer than one sentence.

2 More references

Here we see if the reference [HP04] to the Narendra article comes out OK, in particular, with volume, number & pages.

The necessary information for those who would use BibTeX is available in the 1988 document of Prof. Patashnik [HP04]. Interested readers who can read French may also want to read Poussin's proof[HP04], though it has nothing at all to do with BibTeX.

3 Conclusion

This is the concluding paragraph. Here I cite another of Oren Patashnik's books[HP04] and, again, van Leunen's and Poussin's [HP04, HP04].
